anurag.yadv1905@gmail.com | (+91) 96213 85499 | Greater Noida, UP
Portfolio — Full Stack Developer | GitHub | LinkedIn | LeetCode (200+ solved)

SUMMARY

Final year CS undergraduate (CGPA 8.12/10, 2027) with hands-on experience building production-grade MERN stack applications and ML-based security systems. Developed a 97.3%-accurate XGBoost SQL injection detector with SHAP explainability and a deployed full-stack booking platform. 200+ LeetCode problems solved. Looking to apply full-stack and ML skills to real engineering problems as a software engineering intern..

SKILLS

Programming Languages:	C, Java, Python, JavaScript
Web Development:	HTML, CSS, JavaScript, React.js, Node.js, Express.js (MERN Stack)
Database Management:	MySQL, MongoDB
ML / AI:	XGBoost, TF-IDF, SHAP (Explainable AI), scikit-learn, Pandas, Numpy
Tools & Platforms:	Git, GitHub, VS Code

ACADEMIC PROJECTS

Detection of SQL Injection Queries Using Machine Learning

Live: <https://sql-detection.streamlit.app/>

Github: <https://github.com/6387anu/SQL-Injection-Detection-Using-Machine-Learning>

Tech: Python, XGBoost, TF-IDF, SHAP, scikit-learn, Flask, Pandas, NumPy, Joblib, Streamlit

- Engineered an end-to-end SQL Injection Detection system using XGBoost with Character N-gram TF-IDF vectorization to classify malicious and benign SQL queries, achieving over 97.3% classification accuracy on 50,000+ labelled samples while effectively detecting obfuscated and encoded attack patterns.
- Implemented **SHAP-based Explainable AI (XAI)** to generate per-prediction feature attributions, reducing model opacity and enabling security analysts to audit and trust model decisions without requiring ML expertise — directly addressing the black-box problem in cybersecurity systems.

PERSONAL PROJECTS

Wanderlust — Full-Stack Accommodation Booking Platform

Live: [Wanderlust](#) | Github: <https://github.com/6387anu/WanderLust>

Tech: MongoDB, Express.js, React.js, Node.js, JWT, bcrypt

- Architected and deployed a full-stack accommodation listing platform inspired by Airbnb, enabling users to explore, search, filter, create, edit, and manage property listings with a responsive server-rendered UI and MVC-based architecture.
- Designed RESTful routes using Node.js and Express.js, implemented session-based authentication and authorization with Passport.js, server-side validation using Joi, Cloudinary-based image management, and Mapbox geocoding for interactive location mapping.

CERTIFICATIONS

Generative AI Research Agent — Microsoft, 2026

Full-Stack Web Development — Apna College, 2025

React Developer Certification — Infosys / Springboard, 2025

Data Structures & Algorithms — Apna College, 2026

EDUCATION

Galgotias College of Engineering and Technology, Greater Noida, UP

B.Tech — Computer Science and Engineering

CGPA: 8.12/10 2023 – 2027

ACHIEVEMENTS

- Participated in **3 national-level hackathons** including Smart India Hackathon 2025 (internal qualifier), IIIT Delhi Ideathon, and GFG Hackathon.
- Solved **200+ Data Structures and Algorithms problems** on LeetCode (handle: [Anurag_y](#)).
